

RD-4 — BSA / AML Compliance Policy

Mintware · Bridge/Stripe Stablecoin-Issuing Card Program

1. Reliance on Bridge/Stripe compliance infrastructure

Mintware's card-issuing program operates on a bank-sponsored, program-manager model via Bridge/Stripe Issuing, sponsored by Lead Bank. Per Bridge/Stripe's confirmation (2026-09), the following AML/BSA functions are performed using Bridge/Stripe's own compliance infrastructure, not a Mintware-built system: KYC identity verification on all customers; verification of the accuracy of KYC information collected; risk-rating of customers (geographic risk, PEP status, transactional/behavioral red flags, product usage); ongoing transaction monitoring for suspicious activity; and Suspicious Activity Report (SAR) and related regulatory filing obligations, which sit with Bridge/Stripe/Lead Bank as the regulated party in this program structure. Mintware relies on this infrastructure as its issuing partner's compliance program and does not operate a parallel, independent KYC/AML detection system.

2. Mintware's own internal accountability layer

Money Laundering Reporting Officer (MLRO). Michael Mantello is designated as Mintware's Money Laundering Reporting Officer, responsible for serving as Mintware's internal point of contact for AML/BSA matters relating to this program, escalating and coordinating with Bridge/Stripe/Lead Bank on any compliance inquiry or flagged activity, and maintaining this policy document.

Escalation process. Where Bridge/Stripe's monitoring flags a customer or transaction for review, Mintware's MLRO is notified and coordinates Mintware's response within the timeframe Bridge/Stripe requires.

Record-keeping. Mintware retains records of customer organizations, their members, and card issuance decisions within its own systems, available to support Bridge/Stripe/Lead Bank's compliance reviews on request.

Annual training. Mintware commits to annual AML/CFT training for all personnel with access to customer onboarding, card issuance, or compliance escalation functions.

3. Governance approval

This policy, and Mintware's reliance on Bridge/Stripe's compliance infrastructure as described above, is approved by Mintware's governing body (founders acting as the company's board).

Nicolas Robinson, Founder — signed 09/12/2026

A handwritten signature in black ink that reads "Michael Mantello". The signature is fluid and cursive, with a long horizontal stroke at the end.
